

TCA Spotlight

Proven Results at Miami Southridge

"I have been using the TCA StudyGuide for the SAT at Miami Southridge for several years as a key component of my SAT Prep class. The in-depth content of the StudyGuide enabled me to quickly develop a high-caliber course that gets results. My students cover the full spectrum of abilities and my semester-long classes' average increases in excess of 100 points on the Math and Critical Reading sections.

In addition to working with my own students, I have also had the opportunity to work with student-athletes from around the state with very similar results.

The strength of the software is its ability to precisely diagnose students' weak skills and provide lessons and quizzes to remediate those weaknesses. I'm very excited about incorporating the new Curriculum Guide into my classroom because it complements the StudyGuide software.

The new web-based software has greatly increased my students' access to the program; they now work in the library and at home to complete their assignments—plus, my students like using the program. The web-based program also makes it simple for me to track and monitor my students' progress.

Finally, I have found TCA's customer care and technical support to be outstanding. They not only support their program, they're also available for advice on how to best improve our SAT prep program."
